Name of Program: Turkey and the Middle East

Name of Program Director(s): Dr. S. Rashid Naim

Location(s) of Program: Turkey

Dates of Program: May 13th to 28th 2013

Program Description: This program takes place in Turkey. As of this writing there are no known serious health concerns that need to be taken into account. It is however, important to note that accessibility for people with physical mobility challenges to many sites in Turkey is very limited or not available. While students will have air conditioning in their hotel rooms, they should expect to not always have air conditioning during their travels. Not much walking will be expected of students, though they should be capable of walking up flights of stairs because elevators will typically be limited. In addition some visits to historical sites might involve walks over steep paths for short distances. These should not be an issue with people who are normally healthy.
